

KEY FEATURES

TURNKEY BYOD

Enable the flexibility of BYOD without compromising corporate security

MULTI-BROWSER SUPPORT

Compatible with Chrome, Firefox, Internet Explorer, Safari, and more

ACCESS FROM ANYWHERE

Equip users with the ability to work and access their data from any device anywhere

PRODUCT OVERVIEW

AmZetta zBrows is a high-performance HTML5 RDP Client providing users with agentless, browser-based access to virtualized corporate workspaces delivered via AmZetta zPortal, Microsoft Remote Desktop Services, or Linux-based terminal services. zBrows, powered by zGateway and zPortal, delivers the ultimate enterprise by enabling TLS-protected and multi-factor authentication access to corporate applications from any device with an HTML5 browser. zBrows empowers enterprises with the ability to implement simple and secure BYOD policies, as well as allow extranet user access to business applications and corporate workspace in a matter of seconds compared to hours or days when employing traditional desktop computing.

Are Your Users Primed for Productivity?

Many companies are ill-equipped for simple and secure remote working policies. BYOD solutions without intuitive browser-based access make both user adoption and corporate integration **difficult**.

Remote workers' limited ability to conveniently access data cuts total work output.

zBrows - A True Zero-Management Application

- Supports browsers including Chrome, Firefox, Safari, Opera; IE10, or IE with Chrome Frame plugin
- HTML only - Install nothing on client side and RDP host
- No Java, No Flash, No ActiveX, no plugin
- SSL secure - No 3rd party VPN required unlike other HTML5 solutions
- Use any HTML enabled device including iPad, iPhone, Android, Windows Surface and desktops running Windows, Mac OS X, Linux or Chromebooks
- File sharing - Simply drag files in and out
- RemoteFX video acceleration
- Clipboard redirection supports text, image and html formats when copying between local and remote
- Easy Printing - No need to install drivers for client printers
- Bring sound to local device or leave it on the remote computer
