Global Vipassana Pagoda
Mumbai, India

CHALLENGE: Previously, Global Vipassana Pagoda used an older version of the server, which had multiple problems due to large files of data, images, and videos. There have been many issues with technical support as well. There were no options to restore the data if it was deleted permanently or accidentally. Moreover, the earlier product was outdated, declared End of Life and no further support was available.

Hence, Global Vipassana Pagoda management has planned to upgrade the data storage array and was in search of a modern solution that allows secure access as well.

Global Vipassana Pagoda rejoices with the customer-driven solutions of StorTrends

Mr. Lokesh Goenka, Trustee - Vipassana Research Institute said,

"The data storage solution provided by AmZetta Technologies has been a part of our business for the last five years and we will continue to be a part of it in the future as well"

"StorTrends is reliable and we are very happy with this Product. Our rating for the AmZetta `s StorTrends 3500i is 10 out of 10".

About Global Vipassana Pagoda, Mumbai, India

The **Global Vipassana Pagoda** is a Meditation dome hall with a capacity to seat around 8,000 Vipassana meditators near Gorai, northwest of Mumbai, Maharashtra, India. The pagoda is to serve as a monument of peace and harmony.

The Pagoda as envisioned by Principal Teacher & Founder Padmabhushan **Shri Satyanarayana Goenka**, has been built out of gratitude to the country of Myanmar & **Sayagyi U Ba Khin** (1899- 1971), Vipassana teacher and the first Accountant-General of Independent Burma, who was instrumental in Vipassana returning to India, the country of its origin.

The Government of India has recognized the Institute for training in Vipassana and for the teaching of **Pali** as the only institute of its kind, which integrates theoretical principles with the practice of **Vipassana**.

Solution from AmZetta

To overcome the challenges, Global Vipassana Pagoda found **AmZetta Technologies** a Data Storage and Digital Workspace solution vendor, offering various solutions in the field of data storage, and one solution among them is **StorTrends 3500i, a Dual controller IP SAN SSD Hybrid Array**. This data storage server has Intel Xeon series Quad-Core processors to tackle big workloads without performance issues and empowers applications including virtualization, centralized storage, snapshots, and disaster recovery. This solution eased the burden a lot for Global Vipassana Pagoda.

Benefits of StorTrends Solution

In comparison with the previous setup, AmZetta's data storage array helped Global Vipassana Pagoda to store data files, large audio and video files, high-resolution large image files, databases, etc. "With this new StorTrends 3500i Dual Controller IP SAN SSD Hybrid Solution, we can take multiple snapshots and recover data more easily," says **Lokesh Goenka, Trustee - Vipassana Research Institute**.

The StorTrends 3500i implemented at Global Vipassana Pagoda serves as a complete backup, synchronization, and disaster recovery solution. Another key aspect of StorTrends solution is its management suite, **ManageTrends**. This web-based management console helps to configure, and manage the storage array and monitor the status of the disks as well.

The Present-day **StorTrends** SSD Hybrid Storage Array from **AmZetta Technologies** had enabled **Global Vipassana Pagoda** to store data files, large audio/video files, high-resolution images, databases, etc. StorTrends 3500i arrays have the necessary reliability, performance, and security as desired.

Highlights of StorTrends Solution

AmZetta's StorTrends 3500i IP SAN array has high performance and good 10G network connectivity.

Daily Snapshot is an important feature of the product, which allows for recovering lost data more efficiently.

Access to the technical support help desk is quick and comfortable, and issues related to storage are resolved more quickly.

ManageTrends console has a graphical dashboard, which is very simple and easy to monitor the health of the device.
